

There is no equal to the **Q PLUG**

The **Q Plug** is a stabilized rooting media that provides the optimum environment. A plant is no better than its roots.

With our proprietary growing mixes, our technology, the uniqueness of our **Agriphillic Soil Handling™**, and our quality control, we will guarantee you the greatest amount of success in your rooting and establishment of crops.

By using the **Q Plug** you may now pull and pack plants, which will reduce shipping and handling expenses. By using the pull and pack method you can now double the quantity of plants shipped in a box and get an accurate count and uniform grade at the same time.
